

# Vending machines for COVID-19 protection products

**With face coverings now mandatory on public transport, it is important for transport operators to make face masks available to those passengers who have not brought their own.**

Our new range of vending machines can dispense face masks and other items such as single use gloves or bottles of hand sanitiser.

## **Key benefits**

- Make legally required face masks available for passengers to purchase
- Simple and quick operation to prevent journey delays
- Offer additional items to help customers protect themselves and others
- Cashless payment to reduce risk of spreading infection
- Simple maintenance and refilling
- Easily re-configurable to sell other items after the pandemic

## FAST PERFORMANCE

Delivering unparalleled speed, reliability and screen responsiveness

## CASHLESS PAYMENT

Capture every sale with a built-in and intuitive cashless solution

## IMPRESSIVE CAPACITY

Holds around 600 masks to avoid out-of-stock events and reduce need for frequent restocking

## MULTIPLE SALES

Shopping cart function enables fast multi-product purchases with one simple transaction

## WEATHERPROOF

Our weatherproof machines offer flexibility of positioning to suit your requirements

## FLEXIBILITY TO RECONFIGURE

Easily re-configurable to sell snacks, confectionery and other items to generate revenue after the pandemic, and change back if needed during another outbreak

### Specification

Electrical supply	220/240v AC 50 Hz, 4A
Payment protocol	M.D.B. (Standard)
Listings	CE, UL, FCC
Options	Lockable cash box
