

# NFC Inlay Brochure

Paragon ID is the largest EU based RFID inlay and label manufacturer with high volume production facilities in Argent, France and Bucharest, Romania. RAIN inlays are manufactured according to the highest ARC approved quality standards. Our standard range of RAIN and NFC inlays cover broad application areas. Inlays for special use cases can be custom designed and produced on request.

Because NFC inlays and labels can be read by smartphones the use of such labels has become very popular in many applications, including contactless payment, brand protection and smart marketing. Paragon ID offers NFC inlays in many different sizes. Read ranges of these labels vary from centimeters for small NFC type 2 tags up to one meter or more for credit card sized NFC type 5 tags.
